### **Agile Test Planning with the Agile Testing Quadrants**

Agile software development is an approach to software development under which requirements and solutions evolve through the collaborative effort of self-organizing and cross-functional teams and their customer(s)/end user(s). It advocates adaptive planning, evolutionary development, empirical knowledge, and continual improvement, and it encourages rapid and flexible response to change.

While the benefit of Agile has been noted by those within firms that create embedded software, or firmware, the practical application of it to combined agile hardware and software development has been difficult to envision. But waterfall methodologies create at times extremely lengthy development cycles (years, for complex systems), and this has caused decision makers to search for ways to ...
