

animal farm discussion questions pdf

Intensive animal farming or industrial livestock production, also known as factory farming, is a production approach towards farm animals in order to maximize production output, while minimizing production costs. Intensive farming refers to animal husbandry, the keeping of livestock such as cattle, poultry, and fish at higher stocking densities than is usually the case with other forms of ...

Animal testing, also known as animal experimentation, animal research and in vivo testing, is the use of non-human animals in experiments that seek to control the variables that affect the behavior or biological system under study. This approach can be contrasted with field studies in which animals are observed in their natural environments or habitats.

The number of wild animals vastly exceeds that of animals on factory farms. Therefore, animal advocates should consider focusing their efforts to raise concern about the suffering that occurs in nature. In theory, engineering more humane ecological systems might be valuable. In practice, however, it seems more effective to promote the meme of caring about wild animals to other activists ...
