Assessments often suggest that GHG emissions can be reduced using a portfolio of low-carbon technologies. At the core of most proposals is the reduction of greenhouse gas (GHG) emissions through reducing energy waste and switching to low-carbon power sources of energy. As the cost of reducing GHG emissions in the electricity sector appears to be lower than in other sectors, such as in the ...

In the case of recreational drug use, harm reduction is put forward as a useful perspective alongside the more conventional approaches of demand and supply reduction. Many advocates argue that prohibitionist laws criminalise people for suffering from a disease and cause harm; for example, by obliging drug addicts to obtain drugs of unknown purity from unreliable criminal sources at high prices ...

The most significant step the U.S. ever took toward reducing the pollution that causes climate change is under attack. On August 3, 2015 President Obama unveiled the final Clean Power Plan, setting the first-ever national limits on carbon pollution from power plants – the nation's largest source of these emissions.

The unemployment rate ended 2018 at just under 4%, substantially lower than most estimates of the natural rate. Could such an ostensibly tight labor market lead to a sharp pickup in wage growth from its recent moderate pace, such that the relationship between wage growth and unemployment is not always linear?
