

atlas of amputation surgery pdf

Amputation is the removal of a limb by trauma, medical illness, or surgery. As a surgical measure, it is used to control pain or a disease process in the affected limb, such as malignancy or gangrene. In some cases, it is carried out on individuals as a preventative surgery for such problems.

Amputation - Wikipedia

General surgery consists of a main corpus of propaedeutic elements and clinical problems, which has been modified over the years by the separate development of numerous sub-specialistic branches.
