The Volkswagen emissions scandal (also called "emissionsgate" or "dieselgate") began in September 2015, when the United States Environmental Protection Agency (EPA) issued a notice of violation of the Clean Air Act to German automaker Volkswagen Group. The agency had found that Volkswagen had intentionally programmed turbocharged direct injection (TDI) diesel engines to activate their emissions ...

A biofuel is a fuel that is produced through contemporary biological processes, such as agriculture and anaerobic digestion, rather than a fuel produced by geological processes such as those involved in the formation of fossil fuels, such as coal and petroleum, from prehistoric biological matter. If the source biomatter can regrow quickly, the resulting fuel is said to be a form of renewable ...

It is clear that climate change is a serious problem that requires research for solutions and effective policies that allow us to meet our energy needs while protecting the environment. That's why oil and gas companies are working to reduce their greenhouse gas emissions.

Climate Change and Energy

1. Introduction. Vehicular emissions significantly influence the composition of the atmosphere and have a strong impact on climate change. The use of alternative fuels has been promoted in the EU as a measure to decrease greenhouse gases (GHG) emissions and also to meet what at the time was a growing demand of energy for transport use. Biofuels have been seen as a measure to reduce emissions ...
