Transformative learning theory says that the process of "perspective transformation" has three dimensions: psychological (changes in understanding of the self), convictional (revision of belief systems), and behavioral (changes in lifestyle).. Transformative learning is the expansion of consciousness through the transformation of basic worldview and specific capacities of the self ...

Information ethics has been defined as "the branch of ethics that focuses on the relationship between the creation, organization, dissemination, and use of information, and the ethical standards and moral codes governing human conduct in society". The term information ethics was first coined by Robert Hauptman and used in the book Ethical challenges in librarianship.

The participants for this project were a group of four high school science teachers from a private, comprehensive, urban high school in Southern California (enrolment = 1150). The group included three men and one woman, all experienced teachers, ranging from 8 to 34 years in the profession. They represented three different subject areas—chemistry, biology, and physics (see Table 1).
