Until the 19th century, linear algebra was introduced through systems of linear equations and matrices. In modern mathematics, the presentation through vector spaces is generally preferred, since it is more synthetic, more general (not limited to the finite-dimensional case), and conceptually simpler, although more abstract. A vector space over a field  $F$  (often the field of the real numbers ...

Are your students ready for the Common Core math exams? You can find out by using Benchmark Now!, a free online tool from Naiku for Grades 3-High School. It is designed to help identify students' knowledge and skills with professionally developed assessments using questions from Houghton Mifflin Harcourtâ€™s Assess2Know® Benchmark Item Bank.

## **Common Core Math--Intro to High School Teaching Resources**

In mathematics, an equation is a statement of an equality containing one or more variables. Solving the equation consists of determining which values of the variables make the equality true. Variables are also called unknowns and the values of the unknowns that satisfy the equality are called solutions of the equation. There are two kinds of equations: identities and conditional equations.
