Today there are certain vestigial biochemical reactions which we believe are relics, echoes of the beginning of life on earth, which are still mediated by RNA catalysts. We think that they are throwbacks to these very early steps, maybe even in pre-cellular life form where RNA was delegated with the task of acting as a catalyst.

Lecture 5: Biochemistry 4 | Video Lectures | Introduction

Biochemistry is one of the crossover fields of chemistry. Biochemists have to understand both the living world

and the chemical world. Even if you don't want to become a biochemist, you'll still have to understand atoms and molecules as a biologist. You'll also have to know about organic chemistry; a much bigger area of chemistry. The key thing to remember is that biochemistry is the ...
