This book, known to C programmers as "K&R", served for many years as an informal specification of the language. The version of C that it describes is commonly referred to as K&R C. This is done automatically when you open a file with a .c extension. cc-mode customizes Emacs for C programming by adding syntax highlighting and indenting. Syntax highlighting = different colors for different words in the C language. Indenting = number of tabs/spaces depending on the nested level for a text line.
