

computing with end user pdf

End users are the ultimate human users (also referred to as operators) of a software product. The term is used to abstract and distinguish those who only use the software from the developers of the system, who enhance the software for end users. In user-centered design, it also distinguishes the software operator from the client who pays for its development and other stakeholders who may not ...

Course fee. Price: Enquire with a consultant Course Introduction. The purpose of this qualification is to confer the qualifying student with a basic knowledge and understanding of using ICT in the organisation, with particular emphasis on word processing, Excel, PowerPoint, Outlook and Access.

National Certificate: IT: End User Computing | DCC

End-user development (EUD) or end-user programming (EUP) refers to activities and tools that allow end-users "people who are not professional software developers" to program computers. People who are not professional developers can use EUD tools to create or modify software artifacts (descriptions of automated behavior) and complex data objects without significant knowledge of a ...

Cloud architecture is the systems architecture of the software systems involved in the delivery of cloud computing (e.g. hardware, software) as designed by a cloud architect who typically works for a cloud integrator. It typically involves multiple cloud components communicating with each other over application programming interfaces (usually web services).
