The EPA Quality Program provides requirements for conducting quality management activities for all environmental data collection and environmental technology programs performed by or for the Agency.

How EPA Manages the Quality of its Environmental Data

In computer science, an array data structure, or simply an array, is a data structure consisting of a collection of elements (values or variables), each identified by at least one array index or key. An array is stored such that the position of each element can be computed from its index tuple by a mathematical formula. The simplest type of data structure is a linear array, also called one ...

In computer science, a stack is an abstract data type that serves as a collection of elements, with two principal operations: . push, which adds an element to the collection, and; pop, which removes the most recently added element that was not yet removed.; The order in which elements come off a stack gives rise to its alternative name, LIFO (last in, first out).
