

### **directed energy leaving earth pdf**

A directed-energy weapon (DEW) is a ranged weapon that damages its target with highly focused energy, including laser, microwaves and particle beams. Potential applications of this technology include weapons that target personnel, missiles, vehicles, and optical devices.. In the United States, the Pentagon, DARPA, the Air Force Research Laboratory, United States Army Armament Research ...

The existence of escape velocity is a consequence of conservation of energy and an energy field of finite depth. For an object with a given total energy, which is moving subject to conservative forces (such as a static gravity field) it is only possible for the object to reach combinations of locations and speeds which have that total energy; and places which have a higher potential energy ...

(ed note: this is a commentary about the computer game Children of a Dead Earth). I see a lot of misconceptions about space in general, and space warfare in specific, so today I'll go ahead and debunk some.

2014-06-15 02:20:45 by MrBubbleSS: I thought of another one, but it's pretty much impossible. I did the math on this myself with simple kinetic energy and ignored relativistic effects (with a little bit of looking up how much energy it takes to tear the Earth apart).
