Radioactive waste is waste that contains radioactive material. Radioactive waste is usually a by-product of nuclear power generation and other applications of nuclear fission or nuclear technology, such as research

and medicine. Radioactive waste is hazardous to all forms of life and the environment [citation needed], and is regulated by government agencies in order to protect human health and ...

Radioactive waste - Wikipedia

There are four reaction mechanisms of HO, which are addition, hydrogen atom transfer, electron transfer and radical interaction. The compounds containing carbon double bonds in their structure are more reactive towards HO attack than saturated molecules. In addition the reactivity towards oxidative compounds decreases with the decrease of the molecular weight and the increase of the oxidation ...
