Next, I use Kasznik's (1999) matched-portfolio method to adjust the absolute value of the AAC. The adjustment for each sample firm is the median absolute value of the AAC for a portfolio of firms matched by a variable that is correlated with both the absolute value of abnormal accruals and board and/or audit committee independence.

"R requires a steep learning curve to master. Gerbing's book flattens that learning curve significantly. The breadth of the topics covered, the helpful worked examples, and the ability to move beyond the subject matter covered to other R applications renders this volume of immense value to researchers and provides an excellent text for graduate statistics courses."-
