In statistics, Markov chain Monte Carlo (MCMC) methods comprise a class of algorithms for sampling from a probability distribution. By constructing a Markov chain that has the desired distribution as its equilibrium distribution, one can obtain a sample of the desired distribution by observing the chain after a number of steps. The more steps there are, the more closely the distribution of the ...

Markov Chain Monte Carlo - VideoLectures.NET

A Markov chain is a stochastic model describing a sequence of possible events in which the probability of each event depends only on the state attained in the previous event.. In probability theory and related fields, a Markov process, named after the Russian mathematician Andrey Markov, is a stochastic process that satisfies the Markov property (sometimes characterized as "memorylessness").

Monte Carlo Method. Any method which solves a problem by generating suitable random numbers and observing that fraction of the numbers obeying some property or properties.

Then, you propose to move (jump) from that position somewhere else (that's the Markov part). You can be very dumb or very sophisticated about how you come up with that proposal.

Monte Carlo-metoder Ãr ett samlingsnamn fÃr en viss typ av matematiska algoritmer som bygger pÃ slumptal. Monte Carlo-metoder kan anvÃndas fÃr att lÃsa vissa problem som Ãr svÃra att lÃsa med konventionella deterministiska metoder, bland annat fÃr att simulera fysikaliska system (till exempel molekylodynamik) eller gÃra vissa statistiska berÃkningar.

Box and Cox (1964) developed the transformation. Estimation of any Box-Cox parameters is by maximum likelihood. Box and Cox (1964) offered an example in which the data had the form of survival times but the underlying biological structure was of hazard rates, and the transformation identified this.

Gaussian processes are non-parametric distributions useful for doing Bayesian inference and learning on unknown functions. They can be used for non-linear regression, time-series modelling, classification, and many other problems.
