Microfabrication is the process of fabricating miniature structures of micrometre scales and smaller. Historically, the earliest microfabrication processes were used for integrated circuit fabrication, also known as "semiconductor manufacturing" or "semiconductor device fabrication". In the last two decades microelectromechanical systems (MEMS), microsystems (European usage), micromachines ...

2. Fundamental issues
2.1. Properties of a common interest. As noted, there are various properties that constitute the figure of merit of piezoelectric materials for certain applications .The material constants most commonly referred to are electromechanical coupling factor, mechanical quality factor, and piezoelectric charge/voltage coefficient.
