I use pdfbox to extract text from generated PDF and check if it contains the data it should. This doesn't check if data is in the correct place, but I don't go that deep with PDF testing. You need to think how deep you want to go, the deeper you go the more time you will spend fixing the tests after a change (I never had a bug that text was in the wrong place and maybe that's why I don't test for it).

Randoop's combination of randomized test generation and test execution results in a highly effective test generation technique. Randoop has revealed previously-unknown errors even in widely-used libraries including Sun's and IBM's JDKs and a core .NET component. Randoop continues to be used in industry, for example at ABB corporation.
