Scaffolding: A suitable teaching characteristic in one-to

Instructional Scaffolding to Improve Learning Similar to the scaffolding used in construction to support workers as they work on a specific task, instructional scaffolds are temporary support structures faculty put in place to assist students in accomplishing new tasks and concepts they could not typically achieve on their own.

Instructional scaffolding to improve learning - niu.edu

I scaffold tasks in my class: occasionally fairly often at every opportunity What I see as the value of scaffolding for enhancing student problem-solving ability in mathematics: What are two concerns I have about scaffolding investigative tasks? Should each student be given the same amount and type of scaffolding when solving a problem?
