A freedman or freedwoman is a former slave who has been released from slavery, usually by legal means. Historically, slaves were freed either by manumission (granted freedom by their owner) or emancipation (granted freedom as part of a larger group). A fugitive slave is one who escaped slavery by fleeing.

For information on how to use replication in such scenarios, see Section 17.3, "Replication Solutions".

MySQL 8.0 supports different methods of replication. The traditional method is based on replicating events from the master's binary log, and requires the log files and positions in them to be synchronized between master and slave.
